

RSACat Committee Website Project Report and Committee Meeting

25 October 2022
2:00 pm – Zoom

AGENDA

1. RSA New Support Website Project Updates – 15-20 minutes

Since last time...

- Improved slight navigation issues using feedback from the test sessions.
- Report compiled and many of the issues were addressed.
- Regular software updates to the development site.
- Cataloging content is still being organized. TBD when upload will begin.

What's next...

- November – December : Content load reaching of cataloging sections of the site.
 - Continue cleaning up theme, making it more uniform across the various page templates.
 - Once completed with these sections, conduct a brief 2nd round of user testing on cataloging pages. 3-5 testers max. Extra feedback to improve navigation and wayfinding in those areas.
- January : launch beside the current site.
 - Evaluate which pages (on current rsanfp.org) can have their content hidden and have traffic rerouted (manually, since I don't think Enterprise allows for auto-redirects.) Domain chosen and registered.
 - All existing links and bookmarks will continue to work.

2. Next meeting date? – I'd like to leave this open.

- Project update at next quarter's User's Group meeting. Potentially use this committee space as an RSACat + website issues forum, from now on.

3. User Testing Report

- Was there anything noteworthy in the report you want to highlight?
- Findings were overall extremely helpful. Other thoughts, questions, concerns?

4. Questions, Open Discussion, and Networking Time

- Members may ask questions, share something, or volunteer a topic.
