Please choose this record, which has Library of Congress's DLC symbol in the 040 field, even though the record is an encoding level 8, which indicates it is an incomplete, pre-publication record. No need to report level 8 records to the RSA Help Desk.

If there are multiple DLC records that describe the same item, please choose the record with more libraries attached to it in WorkFlows or OCLC Connexion (if your library uses Connexion). Report duplicate records in WorkFlows to help@rsanfp.org.

Please do not use this record. Even though it is an encoding level I, the 040 field lacks Library of Congress's DLC symbol. The record shown above with DLC in the 040 is preferable to this non-DLC record, even though the non-DLC record is assigned a full encoding level value of I. Full records can also be assigned blank encoding level values. Report duplicate records in WorkFlows to help@rsanfp.org.
