

RSA FY24 Annual Report

2 September 2024

Mission: Uniting member libraries to increase access to information and materials through resource sharing.

Vision: Engaged, effective, and efficient resource sharing to empower strong libraries.

Strategic Direction: Relevant ongoing directions from RSA's expired Strategic Plan for 2019-2023:

- **Member Engagement:** RSA members understand engagement options and maximize engagement opportunities.
 - Informing and engaging members is a primary importance to RSA's overall success. At the heart of this engagement is communication with members about the availability of services and increased access for members regardless of location. Supporting peer coaching and leadership opportunities will be critical to increasing engagement.
- **Organizational Effectiveness:** RSA offers options for membership that suit the needs of our diverse membership and promote RSA self-sustainability
 - Members highly value their partnership with RSA. Increased communication to encourage participation and standardization will improve efficiency for all levels of membership.
- **Operating Efficiency:** RSA maintains the staff and internal operations to support member needs aligned with our financial resources.
 - RSA staff is integral to the work we do with our members on behalf of their communities. Members indicate a strong desire for more online and in-library training. New training models will allow for better member access, involving both technology and member facilities to alleviate geographic disparities.

Guiding Principles: Areas of focus while converting to a fully independent RSA:

- As directed by RAILS, fully convert RSA into an independent organization. Phase One was the governance transition completed on 1 July 2024, Phase Two is ongoing, reading RSA for directly employ our support staff on 1 July 2025. Phase Three involves moving all IT and daily operations fully to RSA owned and operated equipment, contracts, and services.
- Fully engaging with all RSA members – Direct in-person or remote meetings to re-establish system setup, cataloging site visits, in-person and online training, Membership Chats, and an internal goal of visiting every member at least once every other year.
- Enhance member-to-member collaboration, interactions, mentoring, and collaboration.
- Update the system with online circulation options, updated patron interfaces, simplified and streamlined training and operational processes, new reporting options, and a continual search for additional functionality that makes sense for our consortia. Ensure we maintain an automation system that works for libraries of all types and sizes.
- Start planning for a library automation industry Request of Information (RFI) process to gauge the ability of other vendors to fulfill RSA's complex automation needs. The RFI process is expected to be run in early 2026 with a potential competition between vendors for a new automation system depending on the outcome of the RFI process.
- Continued fiscal responsibility and stewardship of RSA member dollars.
