Subject: New Format to End of Month Reports

Over the last several months, we have been sending new reports to every library's RSA Gmail account. These are intended to replace some of the legacy Workflows monthly reports that are unclear, outdated, or hard to read. The existing end of month reports were designed in 2007 to answer a required online circ and ILL form. That form was retired around 2010. Our other objective is to consolidate many of the old reports down into only a handful.

Here is the current list of new end of month reports and the names of the existing legacy reports they replace.

	B1 ILL state Report	ILL Requests Received

We have nothing to announce about the last few legacy end of month report replacements yet. If you need their data, the old reports remain accurate. Please note, the B1 ILL state Report/ILL Requests Received report has never been accurate because Symphony doesn't record per-library specific hold counts for System-wide hold requests.

RSA will continue to update any new information about end of month reports via the listserv.

Please begin to transition to using the new reports sent from Distribution Services. At some point after the start of the new year, we will discontinue the legacy reports with replacements. This will clean up your email, reduce confusion, and clear up a bunch of reporting time in Symphony on the first of the month.

Please don't hesitate to email the RSA Help Desk (help@rsanfp.org) with any questions or suggestions.

Thank you.
