Did you know? RSA can help if:

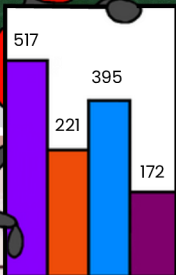

RSA LAB

Please bug us!

BCA

RSA

- Your library needs statistical information for: certification, Illinet, IPLAR, or any other reason.
- You are looking for graphical ways to present your library's data—and place within RSA—to your library Board or Administration.
- You are working on Database cleanup. Item reports include: weeding, inventory, lost, missing, lost in transit, and more!
- You want reports delivered to you on a consistent, regular basis. Most reports can be scheduled for delivery directly to your email on a variety of schedules.
- You need detailed information about the history of an item or patron. RSA staff can run history reports to answer specific questions.
- You need collection management information: what titles are patrons requesting that you don't own, what are the most popular titles and authors, or take a deep dive into your collection.
- You want a list of your items in other libraries and more!
