Overview of the WorkFlows Item Group Editor Wizard

All RSA members may use the item group editor wizard. **Since the item group editor is a very powerful wizard, RSA requires library staff to complete training before beginning to use the item group editor**—even if staff are only searching for, but not modifying, items in the library's collection. Item group editor training is provided by RSA staff and may also be conducted internally at the library by other staff who have already completed RSA item group editor training.

When you participate in training, RSA will configure item group editor access into your individual cataloger account. If you are conducting internal training, please reach out to help@rsanfp.org to request item group editor access be configured in the cataloger account of the staff member who will be trained. Please do not allow other staff members to use your cataloging account to access the item group editor wizard.

All library staff who plan to use the item group editor must be subscribed to and regularly monitor the RSA Announcements, Public/Academic/Special/School, and Cataloging email groups. These email groups will be the communication mechanism for RSA staff to share important information about the item group editor wizard, such as indexing issues. To subscribe to the RSA Announcements, Public/Academic/Special/School, and Cataloging email groups, please fill out and submit this form: <https://form.jotform.com/RSAnfp/rsa-email-groups>. Library staff are also subscribed to these forums after completing item group editor training. If staff are already subscribed, duplicate subscriptions will not result.

The purpose of the item group editor wizard is to allow you to search for a group of items in your collection and then make changes to all of those items in a single batch. Examples of values that can be changed using the item group editor include:

- Home location
- Price
- Item type
- Item category 1
- Item category 2
- Item category 3
- Item category 4
- Item category 5
- Item category 6
- Number of pieces
- Extended information notes (public, circ, and staff notes)
- Statuses for permanent, circulate, and shadowed

The item group editor advanced search interface allows you to search your collection using values that cannot be used to search for items in other WorkFlows wizards (created date, last activity date, current location, etc.). Searching for items in your collection via the item group editor is also more convenient than running a report of your collection in BLUEcloud Analytics (BCA). The item group editor is particularly helpful in identifying inconsistencies in how your collection is cataloged.

The item group editor wizard also includes the option to upload a list of item IDs that all need the same edit(s) performed on them. When the list is uploaded, the item group editor will search WorkFlows and retrieve the item IDs listed in the file. Then the items can be batch edited in item group editor.

The item group editor wizard has another option to save a list of items to make it easy to restore the original values of those items. For example, fiction books shelved on a display, which are no longer on

that display, could be edited back to their original home location code of FICTION using a list saved in the item group editor wizard. Lists of items can also be merged in the item group editor into a single list.

Each RSA library can use the item group editor to modify up to 5,000 items per day. Please note this limit applies per library – not per staff member at your library who uses the item group editor. It is very important you carefully track the number of items you edit in the item group editor. RSA staff cannot track edits for you. Exceeding the 5,000 item per day modification limit may cause indexing trouble overnight and WorkFlows issues the following day.

RSA staff may periodically schedule days for RSA libraries to perform edits to their collections that involve larger numbers of items than the 5,000 items per day limit that is usually in effect. If implemented, these “bulk edit days” will allow your library to change larger numbers of items more efficiently in the item group editor wizard. If you would like RSA to consider scheduling a “bulk edit day” for a special project involving your collection, please contact James Campbell, the RSA System Supervisor, at help@rsanfp.org or 1-866-940-4083.

Batch editing requests for library users should also be submitted to James, as the WorkFlows item group editor wizard only has the capability to modify items—not users.

The item group editor is unable to batch edit call numbers. Batch editing requests for call numbers should be submitted to Erica Laughlin, the RSA Cataloging & Database Supervisor, at help@rsanfp.org or 1-866-940-4083.

Before You Begin Using the Item Group Editor Wizard

If you have not done so already, work with colleagues at your library to determine batch edits that are needed in your collection.

Examples of batch edits:

- Does your library currently use the home location code STACKS, but you would prefer to use more specific home locations, such as FICTION, NONFICTION, J-EASY, etc., to make materials easier to find and provide more specific collection statistics?
- Does your library have quite a few books or DVDs assigned a “new” item type code (e.g., N-BK or N-DVD) that are no longer new and need to be assigned the item type your library uses for its non-new materials?
- Has your library assigned the item category 1 code UNDEFINED to many of its materials, and UNDEFINED needs to be changed to FICTION, NONFICTION, or EQUIPMENT?
- Has your library assigned the item category 2 code UNDEFINED, which needs to be edited to the appropriate reading level (adult, young adult, or juvenile)?
- Are mystery, romance, science fiction, or other genres popular in your collection? If so, assigning item category 4 codes would improve searching for patrons in the RSAcat, as well as statistics for how your collection is being used.

You can use BLUEcloud Analytics to generate reports of how your collection is cataloged. The reports will help you identify potential edits that are needed. If you have questions about how to run a certain report, or if you would like RSA to run a report for you, please submit an RSA report request:

<https://support.librariesofrsa.org/project/report-request-forms/>.

RSA staff can also provide you with a shelf list of your entire collection, or a section of it, sorted in call number order. The shelf list is helpful for a bird’s eye view of how different sections of your collection have been cataloged.

Checking Your WorkFlows Version Number

Please check your WorkFlows version number to ensure your WorkFlows software is up-to-date. You will only need to check your WorkFlows version number once. However, if you will use the item group editor wizard on another computer that has WorkFlows installed on it, you will need to repeat these steps to verify that WorkFlows 4.1.0.0.1367 is installed on that computer.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Help menu at the top.
3. Click on the “About...” option.

A pop-up box will open:

4. In the pop-up box, under the SirsiDynix WorkFlows logo, look for the following series of numbers (circled above): 4.1.0.0.1367
5. If version number 4.1.0.0.1367 appears in the pop-up box, your WorkFlows software is up-to-date. You will be able to access the item group editor wizard.

If a version number *other than* 4.1.0.0.1367 appears in the pop-up box, you must update your WorkFlows. The WorkFlows installation files for the most recent version of the software are posted here: <https://support.librariesofrsa.org/project/downloads-setup/>.

If you need assistance updating WorkFlows, please contact James Campbell, the RSA System Supervisor, at help@rsanfp.org or 1-866-940-4083.

6. After you check the WorkFlows version number, click OK to close the pop-up box.

Enabling Multiple Windows Mode & Tabbed Windows in WorkFlows

In order to allow you to easily switch between the WorkFlows item group editor wizard and another wizard (for example, Item Search and Display), check the WorkFlows desktop preferences to make sure multiple windows mode and tabbed windows are enabled. These settings will only need to be adjusted once, but if you will use the item group wizard on another computer that has WorkFlows installed on it, you will need to repeat these steps on that computer.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Preference menu at the top.

3. From the Preference menu, click on "Desktop."

4. From the next menu, click on “Desktop Setup...”

A Desktop Setup box appears:

5. Click the gadget next to the max response size box.

6. Type 5000000 into the field and click OK:

If 5000000 already appears as the max response size, click OK.

7. Scroll down to the bottom of the Desktop Setup box.

8. Check the box next to “Multiple windows mode.”
9. Check the box next to “Tabbed windows” in order to display the tabs for open wizards at the top of the WorkFlows screen.

If you prefer the tabs for the open wizards to display at the bottom of the WorkFlows screen, check the box next to “Tabbed windows on bottom.”

10. Once you enable multiple windows mode and tabbed windows, click OK to close the Desktop Setup box.
11. A pop-up box appears, warning the changes will not take effect until you restart WorkFlows:

Click OK to close the box.

12. Exit WorkFlows in order to activate multiple windows mode and tabbed windows. Click the red X in the upper right corner.

13. A pop-up will appear with the message, "This will halt the workstation":

Click Yes.

WorkFlows will close. You should see your computer's desktop.

14. Double click on the WorkFlows icon on your computer's desktop. Log into WorkFlows using your individual cataloging account.

15. Once you restart WorkFlows, you should be able to open multiple wizards at once. WorkFlows will display a tab for each open wizard at the top or bottom of the screen, depending on your selection in step 7 from above.

The following screen shot shows WorkFlows with multiple windows mode and tabbed windows enabled to display at the top of the WorkFlows screen. The item group editor and the item search and display wizards are simultaneously open in the screen shot below.

Setting Item Group Editor Wizard Properties

Before you use the item group editor wizard, check its properties to make sure it uses those listed below. Properties will only need to be adjusted once, but if you use the item group wizard on another computer that has WorkFlows installed on it, repeat these steps on that computer.

1. Log into WorkFlows using your library's SUPER account.
(**Important:** The SUPER account should *only* be used to adjust properties for the item group editor wizard, as well as properties for other WorkFlows wizards. Never catalog or circulate while logged in as SUPER.)
2. Click on the Cataloging module at the top.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *right* click.
5. Select Properties.

A Set Properties box appears. Click on the tab labeled “Behavior”:

6. Check the box next to “Update dynamic indexes when editing items.”

If you modify items in the item group editor and then re-search for those items using the value(s) you just modified, the item group editor will retrieve the recently edited items only if your item group editor wizard is configured to update dynamic indexes.

7. In the Set Properties box, click on the tab labeled “Defaults.”

8. Next to “Display property page,” make sure the radio button next to “Never” is selected.
9. For “Start with,” select the button next to “Item Search.”
10. For the number of items per browse screen, enter 5000
11. For “Item Search,” select the button next to “Advanced.”
12. Use the index drop-down menu to select Item ID. This will serve as the default index if you perform a search using only one field in the item group editor.
13. *Optional*—Under “Item lists,” you can select additional fields to display in the item lists generated by the item group editor. Author, copy number, and circulate flag are the optional fields you can include in the item list. You might find it helpful to select author.

Below is a screen shot of the Defaults tab in the item group editor’s Set Properties box:

The screenshot shows a dialog box titled "Item Group Editor : Set Properties". At the top, there is a section for "Display property page:" with two radio buttons: "Wizard Startup" and "Never". The "Never" radio button is selected. Below this, there are two tabs: "Behavior" and "Defaults". The "Defaults" tab is active. The "Search preferences" section contains the following options: "Start with:" with radio buttons for "Item Search" (selected) and "Group Search"; "Number of items per browse screen:" with a text box containing "5000"; "Item Search:" with radio buttons for "Single" and "Advanced" (selected); and "Index:" with a dropdown menu showing "Item ID". The "Item Lists" section contains three checkboxes: "Display author" (checked), "Display copy number" (unchecked), and "Display circulate flag" (unchecked). At the bottom of the dialog box are "OK" and "Cancel" buttons.

14. Click OK to close the pop-up box.

15. **Important:** To ensure WorkFlows saves the default properties for the item group editor, click the X in the upper right corner of WorkFlows.

16. A pop-up will appear with the message, “This will halt the workstation.” Click Yes.

17. Another pop-up will appear with the message, “Properties have been changed. Would you like to save changes?” Click Yes.

If No is selected, none of the item group editor wizard’s settings will be saved for your next WorkFlows session.

WorkFlows will close. You should see your computer’s desktop.

Searching for Multiple Items

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

The item group editor's advanced search screen opens.

The top portion of the screen contains the various fields you can use to search for items.

The result list appears below the search fields.

The item list is below the result list. You will add results to the item list so that those items can be edited together or saved as a group for editing.

Search Fields

Library: Home location: Price: Search

Date created: Date inventoried: Media desk: ☐ Single ☒ Advanced

Create Group Edit Items Remove Items Clear Item List Close

5. Select the values you want to use to search for items in your collection.

Tips for using the item group editor's advanced search interface:

- You can select a single value to search by, or you can select multiple values to search by.
- The media desk, reserve status, and item cat 7-10 fields are not currently used by RSA libraries and should not be selected in your search.
- A gadget button appears next to many of the search fields:

- Click the gadget to open a box that will allow you to select one value or multiple values for that particular search field. The gadget box for the library value is shown below.
- To select a value, click on it from the “List to choose from” on the left so that it appears in blue:

- In the gadget selection box, select a value or values from the “List to choose from.” Click the  button to move the value(s) to the “List selected” on the right.
- To remove a value from the “List selected,” click on that value and click the  button.

Important Note:

If your library’s WorkFlows drop-down menus for item type, home location, or item category 1-5 codes have been customized to only include those codes your library assigns to its collection, only the codes from your customized menu(s) will appear in the gadget selection boxes in the item group editor.

Please see the next section of this document for instructions how to search for items in your collection that are assigned codes that no longer appear in your WorkFlows drop-down menu.

- Several gadget selection boxes on the item group editor’s advanced search screen include four options involving “policies.”

Below is a screen shot of these policy options for the library value:

- *Includes selected policies* will include the specified values in the search results. This option is selected by default in the gadget selection box.
 - *Excludes selected policies* will not include the specified values in the search results.
 - *Contains invalid policy* will search for any values RSA has removed on a system-wide level and are no longer recognized as valid by WorkFlows. You should see an “Item not found in catalog” message if you attempt to perform a search that uses the invalid policy option.
 - *Contains no policy* will search for any items that are assigned a blank value, if that value may be selected as a possible value for that field. “Contains no policy” is helpful to find those items to which your library assigned a blank value for item categories 1-10. For many of the search fields, “Contains no policy” will return no results if you select it and perform a search.
6. After you select the fields for your search on the advanced search screen, click the Search button or hit <Enter> on your keyboard.

If you need to enter a new search, click the Clear button to quickly clear all of your search field selections.

Item List

Title	Author	Call Number	Library	Item ID	Type	Current Location
-------	--------	-------------	---------	---------	------	------------------

Important: Only 5,000 items may be added to the item list at one time. Editing a list of more than 5,000 items will slow WorkFlows. To avoid slow performance, limit your item list to 5,000 items or less.

The “Add all” helper button adds only those items displayed on the *current page* of results. You may use the blue arrow buttons for “Search Forward” and “Search Backward” to navigate through the search results.

Remember: Only 5,000 items may be added to the item list at one time. Your library should edit no more than 5,000 items per day.

The navigation buttons are circled in the screen shot below. WorkFlows may take a minute or two to navigate between pages of search results.

Result List: 2528 records, displaying 1001-2000

Create Group Edit Items Remove Items Clear Item List Close

All of the items will immediately be removed from the item list. WorkFlows will not prompt you to confirm the removal.

Searching for Items Assigned Cataloging Codes No Longer in Your WorkFlows Menu

If your library's WorkFlows drop-down menus for item type, home location, or item category 4-5 codes have been customized to only include those codes your library assigns to its collection, only the codes from your customized menu(s) will appear in the gadget selection boxes in the item group editor. Items in your collection may still be assigned codes that formerly appeared in a WorkFlows drop-down menu, even though those codes have since been removed from the menu.

For assistance identifying cataloging codes still assigned to items in your collection, but no longer in your WorkFlows drop-down menus, please contact the RSA Help Desk at help@rsanfp.org or 1-866-940-4083.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

5. The advanced search screen opens. Click the gadget button next to the library field:

Item Group Editor *

Item Group Editor : Item Search

Library: Home location: Price: Search

Create Group Edit Items Remove Items Clear Item List Close

6. From the gadget selection box, click on your library in the list on the left. Click the arrow to move it to the list selected on the right.

In the example below, the Viola Public Library is selected. Please select your library from the list on the left.

7. Once you click OK, the gadget selection box will close. The name of your library should appear in the library search field.

Viola Public Library appears in the example below:

Click the gadget button next to the field by which you want to search (home location, item type, or item category 4 or 5).

Once the gadget selection box opens, check to see if the value you want to use in your search still appears in the list. If the value does not appear in the list, it has been removed from your WorkFlows drop-down menu.

In the example below, the MYSTERY item category 1 code does not appear in the gadget selection box. Codes appear in alphabetical order in each gadget selection box. Since the code does not appear in the gadget selection box, it no longer appears in the library's item category 1 menu.

8. Since the code is unavailable for you to select, click cancel to close the gadget selection box.

9. Turn your <Caps Lock> key on. In the blank field to the right of the code you want to search by, type the code in upper case.

In the example below, MYSTERY is typed into the item category 1 field in upper case.

Item category 1: MYSTERY

You must type the code in uppercase.

If you type the code in lower case and click search, you will see this error:

10. After you type the code in upper case into the search field, a list of items in your collection that are still assigned that code will display in the result list. The item group editor is able to retrieve the items even though the code no longer appears in your WorkFlows drop-down menu.

A list of items assigned the MYSTERY item cat 1 code in Viola Public Library's collection is shown in the example below:

12. Create a group of items or edit them. See the following sections of this document for instructions:

- Editing an Unsaved Item List
- Saving an Item List as a Group

Searching for a Single Item

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

5. The advanced search screen opens. Click the radio button next to “Single.”

The screenshot shows the 'Item Group Editor' window. The top section contains various search criteria fields: Library, Date created, Item type, Item category 3 through 9, Current location, Home location, Date inventoried, Item category 1 through 10, Last activity date, Price, Media desk, Item category 2, Item category 5, Item category 8, Extended info, and Reserve status. There are also radio buttons for 'Permanent' and 'Circulate' (Yes, No, Both) and a 'Shadowed' section. On the right, there are 'Search' and 'Clear' buttons, and radio buttons for 'Single' and 'Advanced'. A red arrow points from the instruction text to the 'Single' radio button. Below the search criteria is a table with columns: Title, Author, Call Number, Library, Item ID, Type, Current Location, and Circulate. At the bottom, there is an 'Item List' section with the same columns and a footer with buttons: Create Group, Edit Items, Remove Items, Clear Item List, and Close.

Title	Author	Call Number	Library	Item ID	Type	Current Location	Circulate
-------	--------	-------------	---------	---------	------	------------------	-----------

Title	Author	Call Number	Library	Item ID	Type	Current Location	Circulate
-------	--------	-------------	---------	---------	------	------------------	-----------

Create Group Edit Items Remove Items Clear Item List Close

6. The item search screen opens.

Item ID should appear as the default in the index drop-down menu if you selected item ID in the item group editor wizard's properties.

The single search by item ID is most useful if you need to retrieve one item in the item group editor.

Scan or type in the barcode in the item ID box that appears below the index drop-down menu.

Create Group Edit Items Remove Items Clear Item List Close

To select a search index other than item ID, click the index drop-down menu to select a different index. Once selected from the drop-down menu, many of the indexes display a gadget button to help you expand or limit your search. Other search index options, once they are selected from the index drop-down menu, provide a radio button that can be used to expand or limit the search.

Searches in the item group editor's single search interface that use indexes other than item ID will not be very helpful for retrieving items in your collection. Searches in this interface that are not based on the item ID will retrieve *all* records in *all* RSA libraries that meet your selection in the index menu. If an index other than item ID is selected, search results will *not* be limited to only those items owned by your library.

7. After you enter your search in the single search interface, click the Search button or hit <Enter> on your keyboard.

If you searched by item ID, the item will appear in the item list (circled below).

If you performed a search using an index other than item ID, the items will display in the result list, above the item list (circled below).

Printing Items in the Item List

You can print a list of the items that appear in the item group editor's item list. The following fields can print for each item:

- Title
- Author*
- Call number
- Library
- Item ID
- Copy number*
- Type
- Current location
- Circulate flag*

The asterisked (*) fields—author, copy number, and the circulate flag—display only when they have been selected in the properties for the item group editor wizard. The author field should be configured to display in the item list if you adjusted the item group editor wizard to use the properties discussed earlier in this guide.

To adjust the item list display properties for printing:

If you also want the copy number or circulate flag to display in the item list and appear when you print the list, check the boxes next to “Display copy number” and/or “Display circulate flag” in the item group editor's properties box. (You can be logged into WorkFlows using your individual cataloger account when you adjust the item list display properties.) Click the OK button on the properties box to save your selections.

To print items in the item list:

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.
5. The advanced search screen opens. Search for the items you want to print.
6. Click the “Add selected” or “Add all” helper button to add the items you want to print to the item list.
7. Once the items appear in the item list, click the Print Items helper button in the upper left corner:

The screenshot shows the 'Item Group Editor: Item Search' window. On the left sidebar, under 'Common Tasks', there is a 'Print' button. A red arrow points from the printer icon above to this button. The main window displays a search interface with a search bar and a table of 44 records. The table has columns: Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, and Circulate. The records are listed below the table.

Sweet magnolia : ...	Jarrett, Norma L.	F JARRETT	AP_ALPHAPK	A12602462384	1	BOOK	NEW-FIC	Y

At the bottom of the window, there are buttons: Create Group, Edit Items, Remove Items, Clear Item List, and Close.

The Print Items helper button will be grayed out, and you will not be able to click on it until you add at least one item to the item list.

A Print Preview window opens:

The arrow buttons at the top of the Print Preview window help you navigate through the document page by page. The arrows followed by the vertical line allow you to navigate quickly to the first or last page of the document.

The magnifying glass buttons allow you to zoom your view of the document in and out.

The page drop-down menu lets you quickly navigate to a specific page in a multi-page document.

When you are ready to print the list of items, click the Printer button at the top of the Print Preview window:

8. A Print box should open. Select the appropriate printer and any properties, such as double-sided, stapled, etc.

Click the OK button to send the document to the printer.

Editing an Unsaved Item List

The item group editor wizard allows you to easily change in batch a single value, or a combination of values, that are assigned to multiple items in your collection. This section will discuss how to edit values for a list of items that you have not saved as a group in the item group editor wizard.

RSA recommends only making changes to items that are not saved as a group if you will not need to restore the edited items to their original values at some point. If you will eventually need to restore the original values of the items in the list (for example, a collection that will be assigned to the DISPLAY home location code will eventually return to its original home location of FICTION), RSA recommends first saving that item list as a group in the item group editor. Doing so will allow those items to be more easily restored to their original values at a later date. Groups will be discussed in more detail later in this guide.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

- The item group editor's advanced search screen opens. Search for the items you want to modify. You can select a single value to search, or you can select multiple values for your search.
- Add the items to be modified to the item list using the "Add all" or "Add selected" helper buttons.

Remember:

You can search for items cataloged by other libraries in the item group editor wizard. However, WorkFlows will not allow you to add other libraries' items to the item list. If you click either the "Add selected" or the "Add all" helper button to try to add items not created by your library to the item list, WorkFlows will simply not add the items. No error message will appear.

- Once the items to be modified have been added to the item list, click the "Edit Items" button at the bottom of the screen:

8. Select the values you want to modify for *all* of the items in the item list. You can select a single value, or a combination of values, to modify at one time.

Under “Item information” in the edit items box, use the drop-down menus to select the values that the item group editor should assign to all of the items in the item list. See the next page for a chart that lists the item values that can be modified in the item group editor.

Remember:

The item values you select and the extended information text you enter into the edit items box will be applied to *all* of the items in the item list.

The chart below lists each item value, as well as a short description of that value, that can be modified using the item group editor wizard.

Item Value	Description
Copy number	WorkFlows automatically assigns sequential copy numbers when you catalog more than one item that is attached to the same call number on a bibliographic record. Please do not edit the copy number. Editing the copy number can cause trouble in the automatic counter on the WorkFlows backend, including if RSA needs to run a history log of the item at some point.
Type	The code assigned to the item that indicates its format (BOOK, N-BK, DVD, MAGAZINE, etc.). The item type determines circulation and hold rules.
Item library	The WorkFlows code of the library that cataloged the items. The value for item library will remain “Will not be modified.” You may only modify items owned by your library and its branches (if applicable) in the item group editor.
Home location	The code that indicates where the item is shelved in your library (FICTION, NONFICTION, STACKS, etc.).
Current location	The code that indicates where the system “thinks” the item is located (checked out, in-transit, holds, etc.). <i>This value cannot be modified in the item group editor.</i>
Item cat 1	The item category 1 code indicates if the item’s content is fiction or nonfiction. Select the EQUIPMENT item cat 1 for any items that do not have fiction or nonfiction content. Each item cataloged in WorkFlows must be assigned an item cat 1. The UNDEFINED value should never be assigned to item cat 1.
Item cat 2	The item category 2 code is assigned to the item to indicate its reading, viewing, or listening level. Select the EQUIPMENT item cat 2 for any items that do not have a reading, viewing, or listening level. Each item cataloged in WorkFlows must be assigned an item cat 2. The UNDEFINED value should never be assigned to item cat 2.
Item cat 3	The item category 3 code indicates the item’s general format. The item cat 3 code assigned to an item depends on its item type. Each item cataloged in WorkFlows must be assigned an item cat 3. The UNDEFINED value should never be assigned to item cat 3. RSA runs a daily script to ensure items are assigned the correct item cat 3 based on their item type.
Item cat 4	The item category 4 code indicates the item’s genre. RSA strongly recommends you assign item cat 4 codes to your collection, especially for any new items cataloged.
Item cat 5	The item category 5 code indicates the item’s sub-genre. Assigning item cat 5 codes to your collection is optional.
Item cat 6	The OCLCEXCLUDE item category 6 code may be assigned to an item whose holding should not be updated in OCLC WorldCat during the RSA monthly process that batch updates OCLC holdings. Because the holding is not updated in OCLC, the item will not be visible for WorldShare interlibrary loan requests. Assigning the OCLCEXCLUDE item cat 6 code is optional. Leave the item cat 6 value as “Will not be modified” if you do not want to assign OCLCEXCLUDE. If item cats 6 does not appear on the item group editor screen, you are not running the latest version of WorkFlows. Download it here from the RSA support site.

Item cats 7-10	The value for item categories 7-10 will remain “Will not be modified.” No need to edit these item cats because RSA is not currently using them. If item cats 7-10 do not appear on the item group editor screen, you are not running the latest version of WorkFlows. Download it here from the RSA support site.
Media desk	This code is part of a WorkFlows module not currently used by RSA libraries. The value for media desk will remain “Will not be modified.”
Number of pieces	Multi-piece items that circulate as a single unit (i.e., assigned a single barcode) should be assigned the appropriate number depending on how many pieces are included in the item. To enter a value for number of pieces in the edit items box, select the blank option from the drop-down menu. Type the value for the number of pieces that should be assigned to all of the items in the item list. Editing the number of pieces to a value greater than one may interfere with self-checkout machines.
Permanent	Select “Yes” or “No” to indicate if the item is permanent to your collection. Most items should be marked as permanent. Rental or interlibrary loan items are two examples of items that may be marked as non-permanent.
Price	All items cataloged in WorkFlows should be assigned a price in case the item is lost or damaged. To enter a value for price in the edit items box, select the blank option from the drop-down menu. Type the price that should be assigned to all of the items in the item list. You do not need to include a dollar sign before the price, but you will need to enter the price in dollars and cents (i.e., 20.00 – not 20).
Shadow item	Select “Yes” or “No” to indicate if all of the items in the item list should be shadowed. Shadowed items are visible in WorkFlows, but not the RSACat. Equipment and interlibrary loan items are two examples of items that your library might shadow.
Circulate item	The value for Circulate should remain “Will not be modified.” The circulate box must be checked for all items. A no circulation rule associated with an item type should be used to block the checkout of an item, rather than unchecking the circulate box.
Extended information	Type the text that should be assigned to all of the items as a circ, public, or staff note. You can create a new note, add the note to the end of the existing note (“append”), or replace the existing note with a new note. You cannot erase an existing note by leaving the note’s text field blank and selecting the “New” or “Replace” option.

Below is a screen shot of the edits performed on a list of items cataloged by Odell Public Library District that share the following:

- The item type NEW-BOOK
- The home location FICTION
- A date created before 07/01/2012

The item group editor will be used to modify the following for all of the Odell items:

- The item type will be modified to BOOK.
- The item category 1 code will be modified to FICTION.
- The item category 2 code will be modified to ADULT.

10. Scroll through the item list and check the Status column. Make sure “Modified” appears as the status.

If “No Changes” appears as the status, this means that particular item was already assigned the value(s) you selected to modify.

If “Item not found in catalog” appears as the status, this most likely means the item was deleted from WorkFlows since you included it in the item list. The item group editor was unable to find the item in the database to modify it.

Edit Items Reset (b) Close

11. Click the Close button once you confirm the items were modified.

--or--

If you need to perform additional modifications to this item list:

- Click the Reset button in the edit items box to clear the values you selected to modify under "Item information" and "Extended information."
- Select the appropriate item values or extended information notes to modify.
- Click the Edit Items button.

Verifying Edits to Items

After you modify items in the item group editor wizard, you have two options to verify the modifications were performed on those items:

- Run a report in BLUEcloud Analytics (BCA). Please note that modifications to items are not immediately visible in BCA. The modifications will only be visible in BCA the following day. For more information about searching for modified items, please see the section of this document titled “Considerations When Searching for Recently Modified Items.”
- “Spot check” several items you modified using the Item Search and Display wizard. You must use another wizard to spot check modifications, as the item group editor is unable to display item information directly from the result list or item list. In order to easily switch between the item group editor and the Item Search and Display wizard, please ensure multiple windows mode and tabbed windows are configured in WorkFlows. For instructions how to configure these settings, please see the section of this document titled “Enabling Multiple Windows Mode & Tabbed Windows in WorkFlows.”

To verify edits to items using the Item Search and Display wizard:

- From the Edit Items box in the item group editor wizard, note either the title or the item ID of an item whose edits you want to verify. An example title and item ID appear in red boxes below.

If you will use the item ID, you may find it helpful to write down the item ID on scratch paper.

Edit Items Reset (b) Close

Leave the Edit Items box open in the item group editor in case you want to spot check more items.

2. From the Common Tasks toolbar, left click on the Item Search and Display wizard:

3. Once you click on the Item Search and Display wizard, two tabs—one for the item group editor and another for Item Search and Display—should appear at the top or the bottom of your screen. The location of the tabs on your screen depends on your setting for tabbed window display.

In the screen shot below, the two tabs for the item group editor and the Item Search and Display wizard appear at the top of the screen:

4. Search by title or item ID in the Item Search and Display wizard.

If you search by title, narrow the search to your library's collection using the Library drop-down menu. Hit <Enter> on your keyboard or click the Search button.

- Once you verify the item information reflects your edits, click the “Return to Search” button if you want to check another item you modified in the item group editor.
- If you are finished verifying items modified in the item group editor, click the “Close” button at the bottom.

Creating a Text File of Item IDs

1. Use BLUEcloud Analytics (BCA) to generate a report of the items you need to edit in the item group editor. The “Item List Builder (from WR)” is a helpful BCA report, but there are many other reports as well. Export the BCA report into an Excel spreadsheet.
 - a. To request the setup of a BCA account or the user ID or password for your existing BCA account, email help@rsanfp.org.
 - b. For instructions how to run a BCA report, refer to these resources:
 - i. Cheat sheet: <https://support.librariesofrsa.org/wp-content/uploads/2024/08/BLUEcloud-Analytics-Running-a-Report-Cheat-Sheet-2024-08-16.pdf>
 - ii. Video (4 ½ minutes): <https://support.librariesofrsa.org/wp-content/uploads/2024/08/BLUEcloud-Analytics-Running-a-Report-Cheat-Sheet-2024-08-16.pdf>
2. Remove **all** of the data on the Excel spreadsheet **except** for the item IDs.

When the report is uploaded into the item group editor wizard, the report may contain **only** the item IDs of the items to modify. The report cannot contain any other information--title, library, item type, etc.

Each item ID **must** appear on a separate line on the report. If more than one item ID appears on a line, WorkFlows will be unable to recognize the item IDs when you upload the report into the item group editor wizard. If more than one item ID appears on a line, copy (Ctrl c) paste (Ctrl v) the item IDs onto separate lines in the spreadsheet.

RSA asks that you limit files of item IDs to upload into the item group editor to **no more than 5,000 items per day**. Smaller files of 100 to 200 items will upload more quickly into the item group editor than a file of 5,000 items.

To delete a column from the spreadsheet, put your cursor over the column and right click. Select “Delete” from the menu.

Remove any rows at the top of the spreadsheet that are blank, contain the report name, or have column headers such as title, library, item type, item ID, etc. Only an actual item ID should appear in the first row.

To delete a row, put your cursor over the row and right click. Select “Delete” from the menu.

3. Scroll to the bottom of the report of item IDs. Note the number that appears to the left of the last item ID in the list (circled below). You will use this number to confirm the items successfully uploaded into the item group editor.

	A
26	A12604036692
27	A12604049108
28	A12604049132
29	A12604049483
30	A12604048453
31	A12604049441
32	A12604049360
33	A12604049433
34	A12604049475
35	A12604048704
36	A12604048827
37	A12604036731
38	A12604049093
39	A12604048291
40	A12604047790
41	A12604048372
42	A12604048869
43	A12604048330
44	A12604048819
45	

4. After all of the content except for the item IDs have been removed, and there are no more than 5,000 items listed, save the spreadsheet using the “text (tab delimited)” option in Excel.

To ensure a successful upload into the item group editor wizard, your report of item IDs **must** be saved in this text file format.

On the “Save As” box in Excel, click on the drop-down menu for “Save as type.”

Select “Text (Tab delimited).”

5. Select a location on your computer to save the file of item IDs.

RSA recommends saving the file in an easy-to-find location on your computer, such as the desktop, a network drive, or a flash drive.

6. RSA suggests you name the file of item IDs using these guidelines:

- Begin with the first two letters of your library's WorkFlows code (e.g., AY for Ayer Public Library District).
- The value (item type, home location, item category, etc.) currently assigned to the list of item IDs, which will help you identify the item IDs contained in the file (e.g., DVDs).
- Enter today's date so you can easily determine from the file name when that file was created (e.g., 9.11.12).

Uploading a Text File of Item IDs

After you create the text file of item IDs, you are ready to upload the file into the item group editor wizard. The item group editor will search WorkFlows and retrieve the item IDs listed in your file.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

5. The advanced search screen opens. Click the Upload Item IDs helper button:

A pop-up box appears for you to upload the file of item IDs:

6. Click the gadget button next to the “File to upload” box.

7. A “Select File” box opens.

Click the “Save in:” menu at the top of the box to find where you saved the file of item IDs on your computer.

Remember: RSA recommends saving files to your computer's desktop, a flash drive, or a network drive so you can easily find the file to upload into the item group editor.

8. From the list of files, click on the file you want to upload so that it is highlighted in blue.

The name of your file should then appear in the “File name” box.

9. Click OK to close the “Select File” box.

The file name should now appear in the “File to upload” box in the item group editor:

(Your file name will vary from that shown above.)

10. Click the Upload button.

During the upload, WorkFlows uses the item IDs listed in your file to retrieve the items from the database.

Depending on the number of item IDs in your file, WorkFlows may take several minutes to retrieve the items.

If any of the item IDs in the file were not found in WorkFlows, an error pop-up box appears that lists those item IDs that were not found.

Items that display the “Item not found in catalog” message were likely deleted from WorkFlows between the time you ran the report of item IDs and uploaded it into the item group editor wizard. Click the red X in the upper right corner to close the error box.

11. The items from your file that WorkFlows was able to find during the upload have been added to the item list.

Confirm the total number of items in the item list (circled below) matches the number of item IDs that were included in your text file. If there are discrepancies, consider any item IDs that generated the “item not found in catalog” error or duplicate item IDs in the text file.

Now that the items are in the item list, you can edit the items from there. Close the wizard once the edits are complete.

Considerations when uploading files:

- The item group editor will display any items in the result list that are not owned by your library, if those items were included in your uploaded file. Although these other libraries' items can appear in the result list, you cannot add the other libraries' items to the item list. You may only edit items cataloged by your library.
- Item IDs that are uploaded into the item group editor will replace any items that already appear in the item list. If you want to add the uploaded items to a list of items that already appear in the item group editor's item list, RSA recommends uploading the file of item IDs first. Then you can use the item group editor to search for the additional items and add them to the list of uploaded items.

Remember: Your library should edit no more than 5,000 items per day in the item group editor wizard.

Saving an Item List as a Group

After you perform a search in the item group editor wizard, you can save those items as a group. Saving groups allows you to easily restore the items' original values if you had subsequently modified those values. For example, nonfiction books shelved in the new nonfiction section, NEW-NF, that are no longer considered new materials, could be edited back to their original home location code of NONFICTION by using a group you had previously saved in the item group editor wizard.

You may only create groups of items cataloged by your library. You may create groups that contain more than 5,000 items, but please remember your library should edit no more than 5,000 items per day in the item group editor.

Once a group is restored to its original values, that group should be promptly removed from the item group editor wizard. Large numbers of groups saved in the item group editor may affect your ability to search for and display a list of all groups saved by your library.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.
5. The advanced search screen opens. Search for the items you want to save as a group.

6. Click the “Add selected” or “Add all” helper button (circled below) to add the items you want to save as a group to the item list.

The screenshot shows the SirsiDynix Symphony Workflows: Item Group Editor: Item Search window. The window has a menu bar (File, Edit, Wizards, Helpers, Modules, Preference, Tools, Help) and a toolbar (Acquisitions, Cataloging, Circulation+, Offline, Outreach, Reports, Requests, Reserves, Selection, Serial Control, Utility). The left sidebar contains sections for Common Tasks, Titles, Call Numbers and I..., Authorities, and Special. The main area is divided into two sections: 'Item Group Editor: Item Search' and 'Result List: 1282 records, displaying 1-1000'. The 'Item Group Editor: Item Search' section has fields for Library (AP_ALPHAPK), Home location (NEW-NF), Price, Date created, Date inventoried, Media desk, Item type, Item category 1, Item category 2, Current location, Last activity date, Extended info, Reserve status, Permanent, Circulate, Shadowed, and Reserve status. The 'Result List: 1282 records, displaying 1-1000' section shows a table of items. The 'Add selected' button (circled in red) is located in the top left of the 'Result List' section. The 'Item List: 1000 records' section shows a table of items.

Buttons at the bottom: Create Group, Edit Items, Remove Items, Clear Item List, Close.

Remember:

- The “Add all” helper button adds *only* those items displayed on the *current* page of results. Use the blue arrow buttons for “Search Forward” and “Search Backward” to navigate through the search results. The navigation buttons are circled in the screen shot below. WorkFlows may take a minute or two to navigate between pages of search results.
- Only 5,000 items may be added to the item list at one time.** Your library should edit no more than 5,000 items per day.
- You can search for items cataloged by other libraries in the item group editor wizard. However, WorkFlows will not allow you to add those other libraries’ items to the item list. If you click either the “Add selected” or the “Add all” helper button to try to add items not created by your library to the item list, WorkFlows will simply not add the items. No error message will appear.

The screenshot shows the 'Item Group Editor: Item Search' window. The left sidebar contains 'Common Tasks' (Call Number and Item..., Label Designer, SmartPort, Item Search and Display, Check Item Status, Help, Print), 'Titles', 'Call Numbers and I...', 'Authorities', and 'Special'. The main area has search filters and two tables: 'Result List' and 'Item List'.

Search Filters:

8. The Create Group window opens.

In the Group ID field, type a name for the group. The group ID may be up to 20 characters. Any text typed into the group ID field will automatically appear in uppercase.

Please do not select the *AUTO* option that appears in the group ID drop-down menu. If you select this option, WorkFlows will assign an auto-generated number to your item group, which will not help you—or RSA staff—easily identify to which library the group belongs.

RSA recommends you create group IDs using these guidelines:

- **Begin with the first two letters of your library's WorkFlows code (e.g., AP for Alpha Park Public Library).**
- The value (item type, home location, item category, etc.) currently assigned to the group, which you plan to modify after you save the group (e.g., NEW-NF).
- If there is space in the group ID's 20-character limit, enter today's date so you can easily determine from your library's list of saved groups when that particular group was created (e.g., 07.05.12)

For example, for a list of Alpha Park Public Library's items that are currently shelved in the new nonfiction location, you would enter the group ID: AP NEW-NF 07.05.12

9. In the Description field, enter a short statement that describes the items in that group.
For example: Alpha Park items shelved in NEW-NF as of 07.05.12

10. Once you have entered a group ID and description, click the “Create Group” button at the bottom.

WorkFlows may take a minute or two to save the group, depending on its size.

11. A pop-up box will appear, confirming the “Group created.” Click OK to close the box.

12. After the group is saved, the following information (circled below) appears at the top of the item list, confirming the creation of the group:

- Date created
- Date last modified
- Created by
- Last modified by
- Library

Item Group Editor: Manage Group

Group Info

Group ID: **AP NEW-NF 07.05.12** Date created: 7/5/2012 Created by: TECH Library: AG_ALS-PDC
 Description: Alpha Park items shelved in NEW-NF Date last modified: 7/5/2012 Last modified by: TECH

Item List: 1282 records

Create Group Save Group Remove Group Edit Items Restore Items (b) New Search (d) Close

13. Click the Close button at the bottom.

Finding a Group

You can use the item group editor wizard to search for all of your library's saved groups or a specific group.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.
5. The advanced search screen opens. Click the Item/Group Search helper button:

The screenshot shows the SirsiDynix Symphony WorkFlows: Item Search window. The interface includes a menu bar (File, Edit, Wizards, Helpers, Modules, Preference, Tools, Help) and a toolbar (Acquisitions, Cataloging, Circulation+, Offline, Outreach, Reports, Requests, Reserves, Selection, Serial Control, Utility). The left sidebar contains a 'Common Tasks' section with icons for 'Call Number and Item ...', 'Label Designer', 'SmartPort', 'Item Search and Display', 'Check Item Status', 'Help', and 'Print'. Below this is a 'Titles' section and a 'Call Numbers and Items' section with icons for 'Add Item', 'Edit Item', 'Global Item Modification', 'Add Ordered Items to ...', 'Global Call Number Mo...', and 'Item Group Editor'. The main area is titled 'Item Group Editor' and contains a search form with fields for Library, Home location, Price, Date created, Date inventoried, Media desk, Item type, Item category 1, Item category 2, Current location, Last activity date, Extended info, Reserve status, Permanent, Shadowed, and Circulate. There are also radio buttons for 'Single' and 'Advanced' search. Below the search form is a table with columns: Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, and Circulate. At the bottom of the window are buttons for 'Create Group', 'Edit Items', 'Remove Items', 'Clear Item List', and 'Close'.

6. The Group Search screen opens.

To retrieve a list of all groups created by your library:

- Leave the group ID box blank.
- Select your WorkFlows code from the Library drop-down menu.

- Click the Search button or hit <Enter> on your keyboard.

The item group editor wizard will retrieve a list of all groups created by your library:

You can re-sort the list of groups by clicking on any of the column headings. Contents in the list can be sorted in ascending or descending order.

For example, if the “Group ID” column heading from the screen shot shown above is clicked, the list will re-sort in ascending order by the group ID:

To retrieve a specific group created by your library:

- Enter all or part of the name in the group ID field. Remember to include the first two letters of your library's WorkFlows code when searching by group ID.
- You can leave the library selection as "ALL," or you can select your library from the drop-down menu.

- Click the Search button or hit <Enter> on your keyboard.

The item group editor will display the item list for that group:

Exporting a Group

You can export a group from the item group editor into an Excel spreadsheet. You can then save the spreadsheet to your computer and manipulate it from there (re-sort the data, resize columns, remove rows or columns, etc.). Exporting groups may be helpful if your library wants to save lists of display items, subject bibliographies, and other groups of items external to the item group editor.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

The advanced search screen opens. Click the Item/Group Search helper button:

The screenshot shows the SirsiDynix Symphony WorkFlows: Item Search interface. The left sidebar contains a 'Call Numbers and Items' toolbar with various icons. A red arrow points from the 'Item/Group Search helper button' icon to the 'Item Group Editor' button in this toolbar. The main window displays search filters for Library, Home location, Price, Date created, Date inventoried, Media desk, Item type, Item category 1, Item category 2, Current location, Last activity date, Extended info, Permanent, Shadowed, Circulate, and Reserve status. Below the filters are two empty tables: 'Titles' and 'Item List', both with columns for Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, and Circulate. At the bottom of the window are buttons for 'Create Group', 'Edit Items', 'Remove Items', 'Clear Item List', and 'Close'.

The Group Search screen opens:

5. Search for the group you want to export.

If your search returns a list of groups, click on the group you want to export so it appears in blue:

6. Click the "Manage Group" button at the bottom.

The item group editor will display the group:

You can then save the spreadsheet to your computer and manipulate it from there (re-sort the data, resize columns, remove rows or columns, etc.).

Adding Items to a Saved Group

WorkFlows will only allow you to add items to a group created by your library. WorkFlows will not allow you to add items to groups created by other RSA libraries.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.
5. The advanced search screen opens. Click the Item/Group Search helper button:

The screenshot shows the SirsiDynix Symphony WorkFlows: Item Search interface. The left sidebar contains a 'Call Numbers and Items' toolbar with icons for 'Add Item', 'Edit Item', 'Global Item Modification', 'Add Ordered Items to ...', 'Global Call Number Mo...', and 'Item Group Editor'. The 'Item Group Editor' window is open, showing a search form with fields for Library, Home location, Price, Date created, Date inventoried, Media desk, Item type, Item category 1, Item category 2, Current location, Last activity date, Extended info, Permanent, Shadowed, Reserve status, and Circulate. Below the search form is a table for adding items with columns: Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, and Circulate. At the bottom of the window is an 'Item List' table with the same columns. The 'Item Group Editor' window has a title bar that says 'Item Group Editor' and a menu bar with 'File', 'Edit', ' Wizards', 'Helpers', 'Modules', 'Preference', 'Tools', and 'Help'. The 'Item Group Editor' window also has a toolbar with icons for 'Add Item', 'Edit Item', 'Global Item Modification', 'Add Ordered Items to ...', 'Global Call Number Mo...', and 'Item Group Editor'. The 'Item Group Editor' window has a 'Search' button and a 'Clear' button. The 'Item Group Editor' window has a 'Single' radio button and an 'Advanced' radio button. The 'Item Group Editor' window has a 'Create Group' button, an 'Edit Items' button, a 'Remove Items' button, a 'Clear Item List' button, and a 'Close' button.

The Group Search screen opens:

6. Search for the group you want to modify.

If your search returns a list of groups, click on the group you want to modify so it appears in blue:

7. Click the "Manage Group" button at the bottom.

The item group editor will display the group:

Item Group Editor : Manage Group

Buttons: Create Group, **Save Group**, Remove Group, Edit Items, Restore Items (b), New Search (d), Close

12. Click the "Save Group" button to save the group with the added items.

13. A pop-up box will confirm the group saved. Click OK.

Removing Items from a Saved Group

WorkFlows will only allow you to remove items from a group created by your library. WorkFlows will not allow you to remove items from groups created by other RSA libraries.

Removing items from a group *only* removes the items from that group. The items still remain in WorkFlows, but they are no longer associated with that group in the item group editor wizard.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.
5. The advanced search screen opens. Click the Item/Group Search helper button:

The screenshot shows the SirsiDynix Symphony WorkFlows: Item Search application. The interface includes a menu bar (File, Edit, Wizards, Helpers, Modules, Preference, Tools, Help) and a toolbar with various modules like Acquisitions, Cataloging, Circulation+, etc. On the left, there is a sidebar with 'Common Tasks' and 'Call Numbers and Items' sections. The main window is titled 'Item Group Editor' and contains a search form with fields for Library, Home location, Price, Date created, Date inventoried, Media desk, Item type, Item category 1, Item category 2, Current location, Last activity date, Extended info, Permanent, Shadowed, Reserve status, and Circulate. Below the search form are two tables: 'Titles' and 'Item List', both with columns for Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, and Circulate. At the bottom of the window are buttons for 'Create Group', 'Edit Items', 'Remove Items', 'Clear Item List', and 'Close'.

The Group Search screen opens:

6. Search for the group you want to modify.

If your search returns a list of groups, click on the group you want to modify so it appears in blue:

7. Click the "Manage Group" button at the bottom.

Resource Sharing Alliance

- The item group editor will display the group. Click on the item you want to remove from the group so that it appears in blue:

The screenshot shows the 'Item Group Editor' window in SirsiDynix Symphony. The window has a menu bar (File, Edit, Wizards, Helpers, Modules, Preference, Tools, Help) and a toolbar (Acquisitions, Cataloging, Circulation, Online, Outreach, Reports, Requests, Reserves, Selection, Serial Control, Utility). The main area is titled 'Group Editor: Manage Group' and contains 'Group Info' and 'Item List 52 records'.

Create Group Save Group Remove Group Edit Items Restore Items (b) New Search (d) Close

11. Click the "Save Group" button to save the group with the items removed from it.

12. A pop-up box will confirm the group saved. Click OK.

Editing Items Saved as a Group

The item group editor wizard allows you to edit values for a list of items that you have saved as a group.

RSA recommends saving groups of items if you plan to restore those items to their original values at some point. When you edit items that belong to a saved group, you can select the option to “archive before editing.” When this archive option is selected, WorkFlows saves the original, pre-edited values of the items that will be modified. (Note, however, that WorkFlows will not archive values of fields that are not modified in the item group editor wizard.)

WorkFlows will retain the archived values until you restore those values to the items in that group. Any actions that are performed on the items between the time you save the archive and restore the values will not affect the archived values.

If an item is included in more than one group, and those groups have also been archived, that item will use the values of the group that is most recently restored.

WorkFlows will only allow you to edit items in groups that are created by your library. WorkFlows will not allow you to edit any items in groups created by other RSA libraries.

For example:

You create a group of holiday DVDs, archive the values, and then change the home location value to indicate these DVDs are on display. While the holiday DVDs are on display, you might change the home location value for one or two of these DVDs (for example, the item needs to be sent to the cataloger to be repaired so the item’s home location value is changed to CATALOGING.)

When you restore the item values for this group of DVDs, they will all be restored to the home location value that was saved in the archive (i.e., HOLIDAY). The DVD assigned the home location of CATALOGING (or some other modified value) would also have its home location value restored to HOLIDAY.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

5. The item group editor's advanced search screen opens. Click the Item/Group Search helper button:

Home location: Will not be modified Current location:

By selecting the archive option, you will be able to restore the values of the items in that group back to the values they were originally assigned before you edited those items.

11. In the Edit Items box, select the fields you want to modify for all of the items in the group. You can select a single field, or a combination of fields, to modify.

Under “Item information” in the Edit Items box, use the drop-down menus to select the values that the item group editor should assign to all of the items in the group.

Under “Extended information” in the Edit Items box, you can type in the text that should be assigned as a circ, public, or staff note. You can create a new note, add the note to the end of the existing note (“append”), or replace the existing note with a new note. You cannot erase an existing note by leaving the note’s text field blank and selecting the “New” or “Replace” option.

Remember:

The item information values you select and the extended information text you enter in the Edit Items box will be applied to *all* of the items in the group.

Below is a screen shot of the edits performed on a group of items cataloged by Tremont District Library that share the following:

- The home location HOLIDAY
- The item type DVD

The item group editor will be used to modify the home location of all these items to DISPLAY.

Note that the “Archive before editing” box is checked (squared below).

Edit Items Reset (b) Close

13. Scroll through the item list and check the status column. Make sure “Modified” appears as the status.

If “No Changes” appears as the status, this means that particular item was already assigned the value(s) you selected to modify.

If “Item not found in catalog” appears as the status, this most likely means that the item was deleted from WorkFlows since it had been included in the group. The item group editor was unable to find the item in the database to modify it.

Remember: WorkFlows will only allow you to edit groups that include your library’s items. If you try to edit items in another library’s group, WorkFlows will display this status message: “Failed: You may not maintain this library’s item information.”

Edit Items Reset (b) Close

14. Click the Close button once you confirm the items were modified.

--or--

If you need to perform additional modifications to this group:

- Click the Reset button in the Edit Items box to clear the values you selected to modify under "Item information" and "Extended information."
- Select the appropriate item values or extended information notes to modify.
- Check the box next to "Archive before editing" if you want to save the current values for all of the items before you perform the edits.
- Click the Edit Items button.

Important:

For information about how to search for recently modified items in WorkFlows, the RSACat, and BLUEcloud Analytics, please see the section of this guide "Considerations When Searching for Recently Modified Items."

Restoring Items in a Group to Their Original Values

If you selected the archive option before you edited the items in a saved group, you can use the item group editor wizard to easily restore the items in that group to their original values.

If an item is included in more than one group, and those groups have also been archived, that item will use the values of the group that is most recently restored.

WorkFlows will only allow you to restore values for items in groups that are created by your library. It will not allow you to restore values for any items created by other RSA libraries.

For example:

In the previous section of this guide, you created a group of holiday DVDs, archived the values, and then changed the home location value to indicate these DVDs are on display. When the holiday DVDs are no longer on display, you can use the item group editor to restore the home location of all of the DVDs in this group to HOLIDAY—the home location value originally assigned to these DVDs that is saved in the group's archived settings in the item group editor wizard.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

5. After you enter the override password, the item group editor's advanced search screen opens.

Click the Item/Group Search helper button:

A screenshot of the SirsiDynix Symphony Workflows: Item Search window. The window has a purple header bar with the title "SirsiDynix Symphony Workflows: Item Search" and the "RSA" logo. Below the header is a menu bar with options: File, Edit, Wizards, Helpers, Modules, Preference, Tools, Help. A secondary menu bar contains tabs: Acquisitions, Cataloging, Circulation+, Offline, Outreach, Reports, Requests, Reserves, Selection, Serial Control, Utility. The main window is divided into several sections. On the left is a sidebar with "Common Tasks" (Call Number and Item..., Label Designer, SmartPort, Item Search and Display, Check Item Status, Help, Print), "Titles" (Call Numbers and I..., Add Item, Edit Item, Global Item Modification, Add Ordered Items to..., Global Call Number Mo..., Item Group Editor), "Authorities", and "Special". The main area is titled "Item Group Editor" and contains a search form with fields for Library, Date created, Item type, Current location, Permanent, Circulate, Home location, Date inventoried, Item category 1, Last activity date, Price, Media desk, Item category 2, Extended info, and Reserve status. There are "Search" and "Clear" buttons, and radio buttons for "Single" and "Advanced" search. Below the search form are two empty tables: "Titles" and "Item List", both with columns: Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, Circulate. At the bottom are buttons: Create Group, Edit Items, Remove Items, Clear Item List, Close. A red arrow points from the "Item/Group Search helper button" icon to the "Item Search and Display" icon in the "Common Tasks" sidebar.

6. The Group Search screen opens. Find the group you want to restore.

Group Search Tip: To quickly retrieve a list of all groups created by your library, leave the Group ID field blank, select your WorkFlows code from the library menu, and click the Search button:

7. Click on the group you want to restore so that the group appears in blue:

8. Click the Manage Group button at the bottom.

The Manage Group screen will display a list of the items that are saved in that group:

9. Click the Restore Items button at the bottom.

Important: The Restore Items button is only available for groups that have been archived. If the group was not archived, the Restore Items button will appear grayed out.

10. In the Confirmation pop-up box, click “Yes” to restore the edited fields to their original values for all items saved in the group.

Depending on the number of items saved in the group, the item group editor may take a minute or two to modify the items.

Once the modifications are complete, the Restore Items Results window opens:

11. Scroll through the item list and check the status column. Make sure “Restored” appears as the status.

If “No Changes” appears as the status, this means that particular item was already assigned the values you selected to restore.

If “Item not found in catalog” appears as the status, this means that the item was deleted from WorkFlows since it had been included in the group. The item group editor was unable to find the item in the database to restore it.

12. Click the Close button once you confirm the items were restored.

The updated Manage Group screen will appear. The items in the list will appear, restored to their original values.

In the example below, the home location value for the DVDs has been restored to the original value -- HOLIDAY -- from the modified home location value of DISPLAY:

The screenshot shows the 'Item Group Editor: Manage Group' window. The 'Group Info' section displays: Group ID: TD HOLIDAY DVDS, Date created: 7/20/2012, Created by: TECH, Library: AG_ALS-PDC, Description: Tremont DL holiday DVDs 7.20.12, Date last modified: 7/20/2012, Last modified by: TECH. The 'Item List' shows 26 records. The table below represents the data shown in the screenshot:

At the bottom of the window, there are buttons: Create Group, Save Group, Remove Group, Edit Items, Restore Items (b), New Search (d), and Close. A red arrow points to the 'Close' button.

13. Click the Close button at the bottom.

Remember:

You are able to search for and display groups created by other RSA libraries. However, WorkFlows will only allow you to restore items in groups created by your library. If you try to restore items in another library's group, WorkFlows will display this status message: "Failed: You may not maintain this library's item information."

Merging Groups

You can merge groups in the item group editor wizard to combine all of the items in two or more groups into a single group. When you merge groups, the original groups are deleted. A single, new group is created that contains all of the items from the merged groups.

Please use caution when merging groups. There is no way in WorkFlows to undo the merge.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the item group editor wizard and *left* click.
5. The item group editor's advanced search screen opens.

Click the Item/Group Search helper button:

The screenshot shows the 'Item Group Editor' window in the SirsiDynix Symphony WorkFlows application. The window has a menu bar (File, Edit, Wizards, Helpers, Modules, Preference, Tools, Help) and a toolbar (Acquisitions, Cataloging, Circulation+, Offline, Outreach, Reports, Requests, Reserves, Selection, Serial Control, Utility). The left sidebar contains 'Common Tasks' (Call Number and Item..., Label Designer, SmartPort, Item Search and Display, Check Item Status, Help, Print), 'Titles' (Add Item, Edit Item, Global Item Modification, Add Ordered Items to..., Global Call Number Mo..., Item Group Editor), 'Authorities', and 'Special'. The main area is titled 'Item Group Editor - Item Search' and contains search filters (Library, Date created, Item type, Current location, Permanent, Circulate, Home location, Date inventoried, Item category 1, Last activity date, Price, Media desk, Item category 2, Extended info, Reserve status) and two empty tables for results. The tables have columns: Title, Author, Call Number, Library, Item ID, Copy Number, Type, Current Location, and Circulate. At the bottom are buttons: Create Group, Edit Items, Remove Items, Clear Item List, and Close.

6. Search for all groups in your library. Leave the Group ID field blank, select your WorkFlows code from the library menu, and click the Search button.

7. From the list of groups, click on the groups you want to merge so they are highlighted in blue. You can click on a group, dragging your cursor up or down, to select multiple groups. You can also highlight multiple groups while clicking with your mouse and holding down the Ctrl key on your keyboard.

8. Click the Merge Groups button at the bottom.

9. The Merge Groups pop-up box opens.
 - a. In the Group ID field, type a name for the group. The group ID may be up to 20 characters. Any text typed into the group ID field will automatically appear in uppercase.

Please do not select the AUTO option that appears in the group ID drop-down menu. If you select this option, WorkFlows will assign an auto-generated number to your group, which will not help you—or RSA staff—easily identify to which library the group belongs.

- b. In the Description field, enter a short statement that describes the purpose of the merged group.
 - c. Select your library from the library drop-down menu if it is not already selected.

10. Click the “Merge Groups” button.
11. A pop-up box will appear, confirming the merge was successful. Click OK to close the box.

WorkFlows will not allow you to merge archived groups. You will see a pop-up box with the error “Archived groups cannot be merged.”

12. After the groups are merged, the following information (circled below) appears at the top of the item list, confirming the creation of the group:

Create Group Save Group Remove Group Edit Items Restore Items (b) New Search (d) Close

The original groups that merged into the new group were removed during the merge process.

13. Click the Close button at the bottom.

Deleting a Group

You can remove any group your library has saved in the item group editor wizard. Deleting a group *only* removes the group. The items still remain in WorkFlows, but they are no longer associated with that group in the item group editor wizard.

Once a group is restored to its original values or it is no longer needed, that group should be promptly removed from the item group editor wizard. Large numbers of groups saved in the item group editor may affect your ability to search for and display a list of all groups saved by your library.

Please use caution when deleting groups, as there is no way in WorkFlows to retrieve deleted groups.

Although you are able to search for and display groups created by other RSA libraries, WorkFlows will only allow you to delete groups created by your library.

1. Log into WorkFlows using your individual cataloging account.
2. Go to the Cataloging module.
3. Open the Call Numbers and Items toolbar on the left.
4. Put your cursor over the Item Group Editor wizard and *left* click.

5. The item group editor's advanced search screen opens.

Click the Item/Group Search helper button:

Create Group Edit Items Remove Items Clear Item List Close

6. Search for the group you want to delete.

Group Search Tip: To quickly retrieve a list of all groups created by your library, leave the Group ID field blank, select your WorkFlows code from the library menu, and click the Search button:

7. From the list of groups, click on the group to delete so that it appears in blue:

8. Click the Manage Group button at the bottom.

9. The group, along with a list of the items assigned to that group, will open. Check the group ID and description boxes at the top of the item list to verify the group displayed is the group you want to delete:

10. Click the Remove Group button at the bottom.

11. A pop-up box will appear, asking you to confirm the deletion:

Click "Yes" to delete the group.

12. Another pop-up box will appear, confirming the group has been removed:

Click "OK" to close the removal confirmation box.

Remember:

Although this message confirms the group and its items have been removed, only the group your library saved in the item group editor wizard has been removed. The items that formerly belonged to the removed group remain in WorkFlows.

Considerations When Searching for Recently Modified Items

The considerations discussed below apply when searching for items that were edited in either an unsaved list or as part of a saved group in the item group editor wizard.

Searching for recently modified items in the item group editor wizard *only*:

As soon as items are modified in the item group editor, the modified value(s) will immediately take effect for searching in the item group editor wizard, provided you selected the “update dynamic indexes” option in the “Setting Item Group Editor Wizard Properties” section of this guide.

If you modify items in the item group editor and then re-search for those items using the value(s) you just modified, the item group editor will retrieve the recently edited items if your item group editor wizard is configured to update dynamic indexes.

If you did not select the dynamic indexing option in the item group editor wizard’s properties, the recently modified value(s) will not be retrieved if you search for them in the item group editor. An “item not found in catalog” message will appear after you perform the search. Overnight the WorkFlows Rebuild Item Database report will index the modified items, so they are visible the next day if you search for them in the item group editor wizard.

In order to ensure search-ability of modified items in a timely manner, RSA recommends selecting the property to update dynamic indexes.

Searching for recently modified items in the RSAcat:

The modified items, with their newly assigned values, are visible in the RSAcat one to two hours after you change them in the item group editor wizard, depending on when the RSAcat indexing cycle began.

Searching for recently *shadowed* items in the item group editor wizard, other WorkFlows wizards, and the RSAcat:

Modifications involving the shadow property in the item group editor do not take effect until the next day, after the WorkFlows indexing report runs overnight. The shadow property you modified using the item group editor will immediately display on the item’s record, but a search for that shadowed item will continue to perform as though you had not changed that item’s shadow property. In other words, if you shadowed the item using the item group editor, the item’s “shadow” property check box will immediately appear selected, but the item will still be visible in RSAcat searches until the following day.

Running reports of recently modified items in BLUEcloud Analytics (BCA):

Modifications made to items using the item group editor are not immediately visible in BCA. The WorkFlows Rebuild Item Database report will update BCA overnight. The modifications you made to items using the item group editor will only be visible in BCA the following day.

Once BCA is updated the next day, you may find it helpful to run a report that lists any items still assigned the original value(s)—i.e., the value(s) that you changed to a *different* value using the item group editor wizard. This report will allow you to easily determine if modification of any items is still needed. For assistance using BCA, please contact the RSA Help Desk at help@rsanfp.org or 1-866-940-4083.
